

Ryan J. Halpin, M.D.

Brain Tumors, Gamma Knife
Radiosurgery, General Neurosurgery,
Minimally Invasive Spine,
Revision Spinal Surgery,
Spinal Deformity

Welcome to Olympia Orthopaedic Associates

As a fellowship-trained neurosurgeon, I specialize in the diagnosis and operative treatment of back, neck, spine, and neurological injuries and conditions. With years of highly specialized training and experience, I use my expertise to engage my patients in learning about their conditions and treatment options, and together, we will develop the most appropriate treatment plan using superior methods to bring healing and the best possible outcomes.

In my practice, I perform a variety of brain and spinal procedures, and I will only use surgical treatment if conservative methods are ineffective in treating your injury or condition. With the latest, proven methods and techniques, I frequently perform brain tumor resection, or removal, as well as gamma knife radiosurgery, which treats brain lesions with therapeutic radiology. I also correct spinal deformities, such as scoliosis. Whenever possible, I use minimally invasive spine surgery and outpatient, or same-day, spine surgery to treat a variety of concerns, which minimizes pain and reduces recovery time.

Please let me know if there is anything my staff and I can do to improve your experience at Olympia Orthopaedic Associates.

I look forward to meeting with you!

Sincerely,

Ryan J. Halpin, M.D.

Ryan J. Halpin, M.D.

- Member: Congress of Neurological Surgeons
- Member: American Board of Neurological Surgery

What to Expect

My staff and I understand that your time is valuable, and we appreciate your understanding and patience if we keep you waiting. In some cases, patients require special attention, or I may be asked to assess a serious injury. However, be assured that I will make every effort to see you as soon as possible.
